## Experience

---

### Senior Application Developer

#### The Kroger Co - Intranet Development & Support, Health & Wellness Developer

- June 26, 2006 - November 30, 2020 (remote since July 7, 2009)
- I developed numerous internal web applications starting from the database and all the way up to the user interface/experience. I worked with stakeholders at all levels to ensure successful and timely delivery. Below are just a few examples:
  - I built the Scheduling Tool application from the ground up using SQL Server, SSIS, ColdFusion, jQuery, REST, HL7, JavaScript, and CSS. It enables patients to make online appointments and administrators to manage resources and schedules for more than 220 clinics and 2200 pharmacies. In the first year alone, the system easily handled over 1MM appointments  
Due to the COVID-19 pandemic, I enhanced it to schedule drive-thru testing, at-home test kit collections, and in-person testing. The goal to provide 500K tests was achieved and there have been 650K tests administered to date.  
I developed endpoints to expose the front-end team to collect patient information from the external website. The back-end application integrates with eClinicalWorks' electronic medical record system via HL7 interface. I also worked Gravity labs to pass patient information using their API for order fulfillment.
  - I also developed the Pharmacy Reportal, a report card of configurable metrics rolled up by week, period and year at the store, district and enterprise levels. It was developed using SQL Server, SSIS, ColdFusion, jQuery, ZingChart, JavaScript, and CSS.  
I enhanced it to collect and manage action plans for pharmacies to focus on and improve. I used stored procedures within and SSIS package to roll up scores on the backend and ingest external data files. Most recently, I provided technical guidance to help migrate the application to Azure.
  - CAO Scorecard is a store-level report to measure and improve the amount of product on the store shelves. Built with SQL Server, SSIS, ColdFusion, ZingChart, JavaScript, and CSS.
  - Production planning sales tool is used to forecast sales and reduce shrink for perishable (meat, deli, and produce) departments using historical movement of thousands of items and stores. Built with SQL Server, SSIS, ColdFusion, JavaScript, and CSS.
  - Enterprise Pharmacy Scheduler is a scheduler and workflow tool for pharmacists, techs & interns based on forecasted demand. Built with SQL Server, SSIS, ColdFusion, JavaScript, and CSS.
  - Customer Donations is an application that processed sales transactions, associations, and allocation of millions of dollars in annual donations to non-profit organizations throughout the U.S. Built with SQL Server, SSIS, ColdFusion, JavaScript, and CSS.

### Software Development Manager, Technical Lead, Web Master, Interactive Media Developer

#### Dynamics Research Corporation - GUARDian Program Management Office

- Oct 20, 2003 - May 2006
- Managed a team of web developers, web masters and web designers in creating and maintaining a number of applications in support of the Air National Guard.
- Developed numerous ColdFusion applications (authentication, conferences, bulletin boards, content management systems, financial systems, and management systems) and components.
  - Conference application allowed users to register and also included the ability for owners to create and modify workshops. The application also had an administrative section that allowed administrators manage conference information, schedules, and participants. Built with SQL Server, SSIS, ColdFusion, JavaScript, and CSS.
  - Modules for Force Management application to make it Section 508 compliant.

- Website for a new office to address initiatives impacting states due to Base Realignment and Closure.
- Web application to track funds and days allocated for National Guardsmen to train. The application was developed from the ground up with SQL Server, ColdFusion, JavaScript, and CSS.
- Web application for the Joint Operations Center. Developed and led a team to create this application used by governors in order to share National Guard Bureau assets available geographically using Google Maps™ API.

**Associate Creative Director, Creative Traffic Manager, Web Designer  
CoolSavings, Inc. (now Q Interactive)**

- Jan 2000 - Sept 2003
- Managed a team of six designers and copywriters
- Designed and tested layouts, HTML email, online printable coupons and banners
- Developed intranets and internet sites for layout guides. Built with ASP, HTML & CSS.
- Created and designed layouts for hundreds of advertisers including DreamWorks, Toys"R"Us, Suave, Land O'Lakes, P&G, Glaxo Smith Kline, Target, Wal-Mart, and Revlon.

**High School Math Teacher  
Saint Scholastica Academy**

- Aug 1995 - June 1999
- Taught Algebra I through AP Calculus utilizing everything from books, blackboard, art, calculators and the internet
- Created a website for students to reference and keep up with assignments

**Education, Training & Awards**

**DePaul University, Chicago, IL**

- Master of Science, E-Commerce Technology, 2004 (GPA: 3.83)

**Wheaton College, Wheaton, IL**

- Bachelor of Science, Mathematics, 1994 (GPA: 3.07)  
Math teaching certification: Illinois Standard High School Type 09
- Awarded one of four *Helen McLenden Ewen Scholarships* by Education Department based on potential, performance, and experience

**Who's Who Among America's Teachers**

- Nominated by students (1998 & 1999)

## **Continuing Education**

- Java/Angular bootcamp (Nov 2018)
  - MAX Technical Training – Cincinnati, OH
- Certified ScrumMaster Workshop (Aug 2011)
  - MAX Technical Training – Cincinnati, OH
- Advanced ColdFusion MX (Dec 2005)
  - [Fingleaf Training](#) – Washington, DC

## **The Kroger Corporation**

- Taking Care of Business Award (Oct 2009)

## **Dynamics Research Corporation**

- Certificate of Excellence (Sept 2005)
- Key Contributor Award (Feb 2005)
- Certificate of Excellence (Aug 2004)
- Outstanding Achievement Award (July 2004)
- Interim Secret Security Clearance (Expired June 2006)

## **Volunteer & Service**

---

- Rebuilding Together - volunteered renovating home in Washington, DC (Apr 2006)
- Culture camp director and counselor for Korean adoptees (1994 - 2002)
- Sunday school teacher (1991 - 1999)
- Summer Leadership School residential counselor (1992 - 1994)
- JV & Varsity volleyball coach (1995 - 1998)
- Freshman basketball coach (1995 - 1998)
